12 February 2023

Dear Ms. Colleen Sheedy

My name is Nduvho Edward Ramashia. I am currently an undergraduate at the University of the Witwatersrand, South Africa, in the field of Electrical and Information Engineering.

I am a very focused and very efficient worker. I am also a very good team player. I was in fact one of the finalist members from the CHPC's SCC 2021 students' competition that were selected to form the ISC22-SCC South African team CHPC.

The HPC competitions exposed to me the many interesting technologies and applications of supercomputers in the real world. The CHPC 2022 national conference, where I attended as a student volunteer, exposed me even more.

I have worked with many and different teams such as during volunteer works and programs, during part-time jobs, and during school projects. These experiences, as well as various student competitions, has turned me into a very good, efficient, and very reliable team-player.

I would be immensely grateful of an opportunity to once more be exposed to what is happening in the HPC and related world, as well as the opportunity to interact and connect with the bright people in the field.

Thank you for your time. I look forward to hearing from you.

Yours sincerely  
Nduvho Edward  
Ramashia
