Dear MTN talent acquisitionist

I am currently a WITS third-year Electrical and Information Engineering student, focusing on Information Engineering.

I have over the years become a very focused and very efficient worker. I have also throughout my academic years been recognized for my programming keenness. On top of all that, I have, while working on my academic and extracurricular project, developed good programming and problem skills, as well as a good time management skill.

I am also a very good team player. I was in fact a member of the team WITS-TEAM-ALPHA, a team that came second out of 15 teams in the 2020 CHPC's SCC national HPC (High Performance Computing) competition.

Because of some maturity problems and a lack of most of the above mentioned qualities at some years back, my academic record contains a rather questionable page, unfortunately.

But having gained the above skills, and a vision, I believe that makes me a great candidate to backup financially.

Thank you for your time and consideration for sponsorship.

Yours sincerely
Nduvho Edward Ramashia
